SHUBHI TARAN

CODING CHALLENGE NO 4:

Coding Challenge - Car Rental System - SQL

Instructions

· Coding Challenge submissions should be done through the partcipants' Github repository, and the link should be shared with trainers and Hexavarsity.

SQL Schema:

- 1. Vehicle Table:
 - vehicleID (Primary Key)
 make

 - model
 - year
 - dailyRate
 - status (available, notAvailable)
 - passengerCapacity
 - engineCapacity

2. Customer Table:

- · customerID (Primary Key)
- firstName
- lastName
- emailphoneNumber

3. Lease Table:

- leaseID (Primary Key)
- vehicleID (Foreign Key referencing Vehicle Table)
- customerID (Foreign Key referencing Customer Table)
- startDate
- endDate
- · type (to distinguish between DailyLease and MonthlyLease)

4. Payment Table:

- paymentID (Primary Key)
 leaseID (Foreign Key referencing Lease Table)
- paymentDate
- amount

Vehicle Table
